

THE ORACLE INSTITUTE

An Advocate for Enlightenment and a Vanguard for Spiritual Evolution

The “**Valley of Light**” is a community-based project of The Oracle Institute, a 501(c)(3) educational charity. Oracle is located along the New River, the oldest river in our hemisphere and second oldest river in the world. Winding through the Appalachian Mountains from North Carolina to West Virginia, the river is 320 miles long and forms fertile valleys. The Valley of Light refers to the river region located in Grayson County, VA.

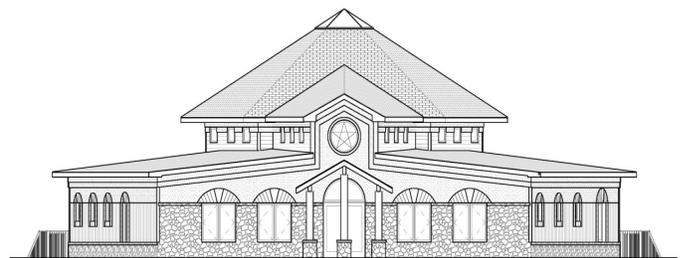

Oracle is cognizant of the *many* unprecedented factors contributing to this turbulent time: global warming, food & water shortages, pandemic indicators, energy & economic abuses, and a total lack of visionary focus by political and business leaders. We believe the key to a smooth transition into the 21st Century is the creation of a new way of living based on cooperation and an acute awareness of the interconnectedness of all life.

Oracle has studied numerous intentional sustainable communities, such as The Federation of Damanhur in Italy, which is nearly 90% sufficient and a leader of the Global Eco-Village Network. Based on our research, Oracle has identified 11 requisite sectors to a full-spectrum community, including Spirituality, which we view as the heart of *any* community. Endorsed by futurist John Petersen of The Arlington Institute as the ideal setting for such an incubator project in the U.S., the Valley of Light is the perfect location for visionary thinkers to design and implement a new model of resilient and compassionate living. Located at an altitude of 2,800 feet and surrounded by water, Oracle’s site is the perfect location for building a model community based on **Truth, Love, and Light**.

Specifically, Oracle seeks hardy, avant-garde souls to help build the Valley of Light. Subcomponents of this futuristic template include: (i) for business, a micro-economy and micro-currency; (ii) for health, a wellness center featuring the best of traditional and holistic medical practices; (iii) for science, taking the town of Independence totally off-grid, via the available hydro-dam and experimental modes of “zero-point energy”; (iv) for agriculture, expansion of the successful LandCare program, also headquartered in Independence; and (v) for justice and governance, new approaches to democracy, consensus building, and dispute resolution.

Currently, Oracle is building the “**Peace Pentagon**” – our publishing headquarters, multi-faith school and sanctuary, and center for conflict transformation. The Peace Pentagon also will serve as home base for the Valley of Light community, where many people already farm organically, employ renewable energy, and comprehend the gravity of the upcoming changes and the need to achieve sustainability and resilience.

If you have a strong will, a sound mind, a good work ethic, and a balanced ego, we want to talk with you! Please see our website for further information about Oracle’s educational charity, non-profit businesses, spirituality school, Peace Pentagon headquarters and sanctuary, and future plans for an intentional community.
